

## Your Child's Dental Treatment

We are here to provide your child with the best dental treatment in a professional and caring environment. **One parent or guardian** may accompany the child for their treatment with the understanding that Dr. Hartman will be the **only** person giving directions to the child. When the child receives directions from multiple individuals it tends to confuse them and make the visit more difficult. If the parent/guardian does not adhere to this policy they will be asked to leave the room.

## X-Rays

Dr. Hartman requires bitewing x-rays every 12 to 18 months and may require a full mouth series every five years, depending on your oral condition and the amount of restorative work. ***X-rays are required to properly diagnose your dental health.*** If x-rays are refused you will be dismissed as a patient due to liability issues. Dr. Hartman will be happy to explain any concerns you may have regarding radiation.
